Daily Weather Threat Briefing

Regional Operations Center

Western Region

Sunday, June 26

9:00 AM PDT

Day 1 (Sunday): Moderate to locally high heat risk impacts continue for much of the state due to hot daytime temperatures. Fire weather conditions also remain locally elevated in and around the mountains and foothills due to breezy winds.

Risk Levels	Little to None	Minor	Moderate	Major	Extreme		

Weather Key Points

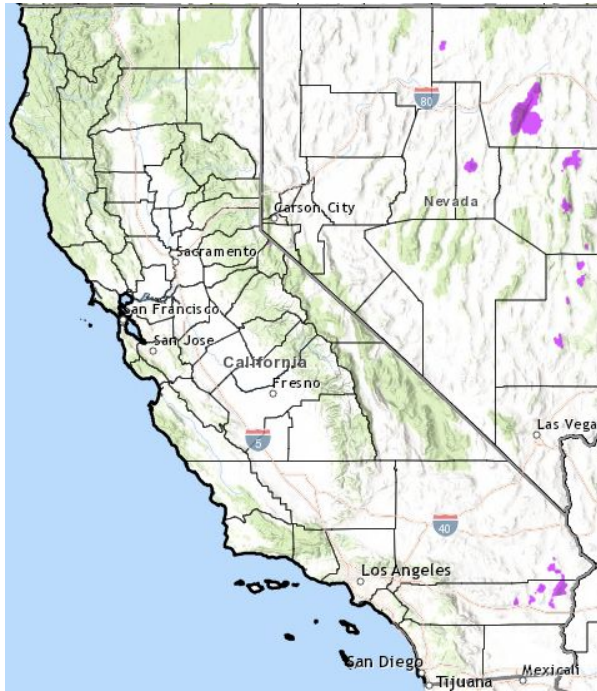

Regional Operations Center

Western Region

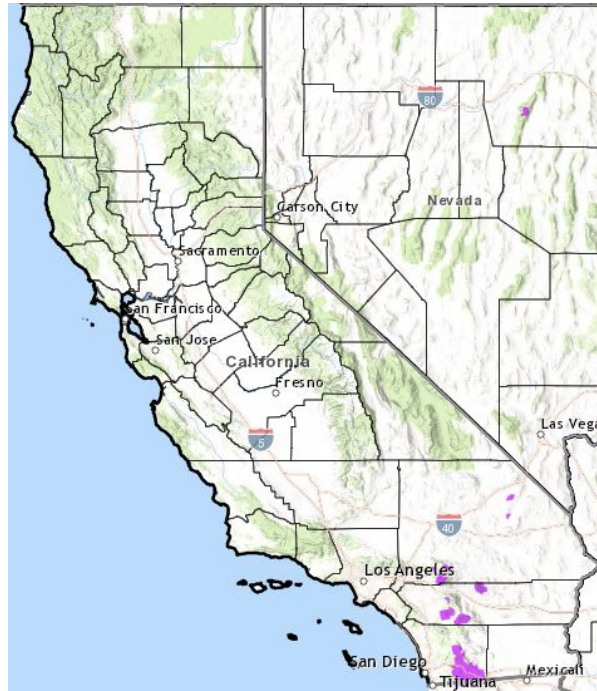

Sunday, June 26

- The weather pattern remains very stagnant across the state into mid week, with continued hot temperatures inland bringing moderate to locally high heat risk impacts. Temperatures will trend cooler for mid to late week.
 - Afternoon readings of 100 to 107 degrees will continue across the Central Valley and inland southern California valleys, with even hotter readings over the southeast deserts
 - Temperatures will also warm considerably across the northern California valleys and Modoc Plateau through Monday
 - Overnight low temperatures will remain more comfortable, falling into the 50s and 60s for many areas, and into the 70s over the southern deserts
- Fire weather conditions will be locally elevated most afternoons through the weekend and much of next week due to breezy winds, particularly Monday through Wednesday. Widespread critical fire weather conditions are not expected.
- Dry conditions continue across the state this week
 - Isolated showers and thunderstorms are possible during the afternoon and evening hours into mid week along the Arizona border.

Precipitation Forecast

Sunday

Monday

Tuesday

Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

Precipitation (inches)

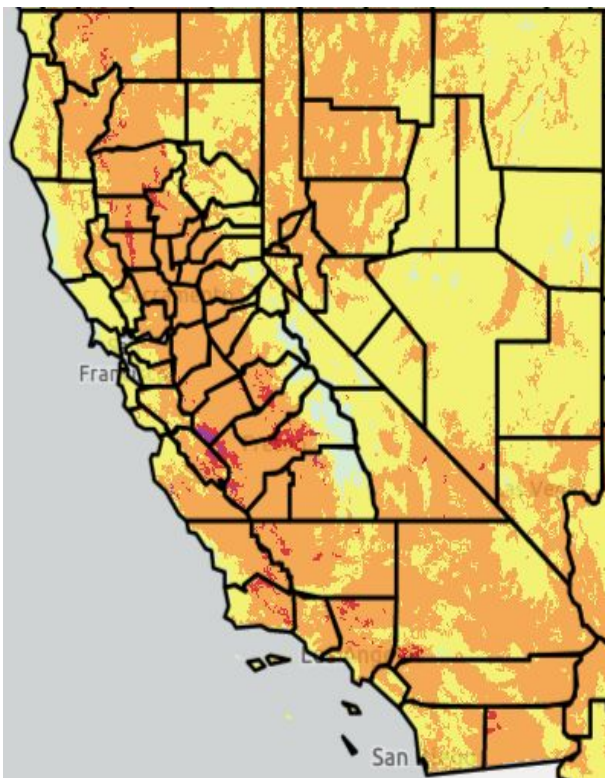

Heat Risk

Regional Operations Center

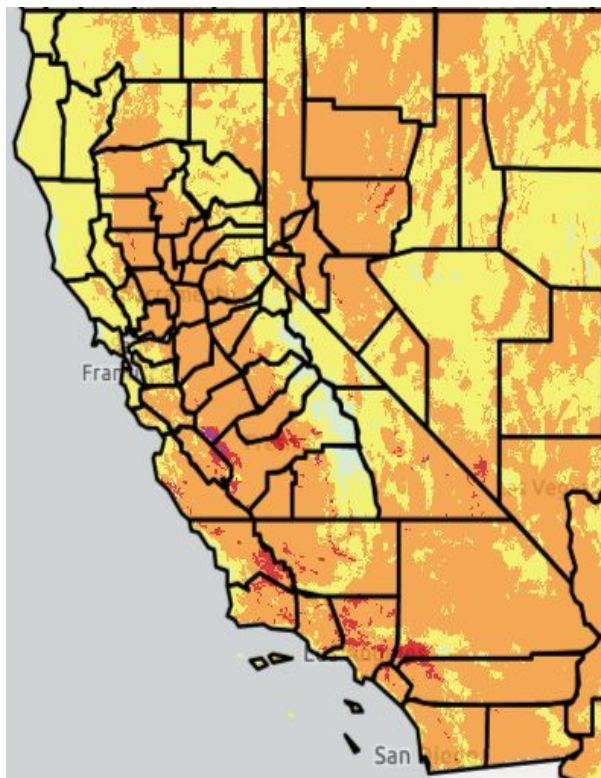

Western Region

Sunday, June 26

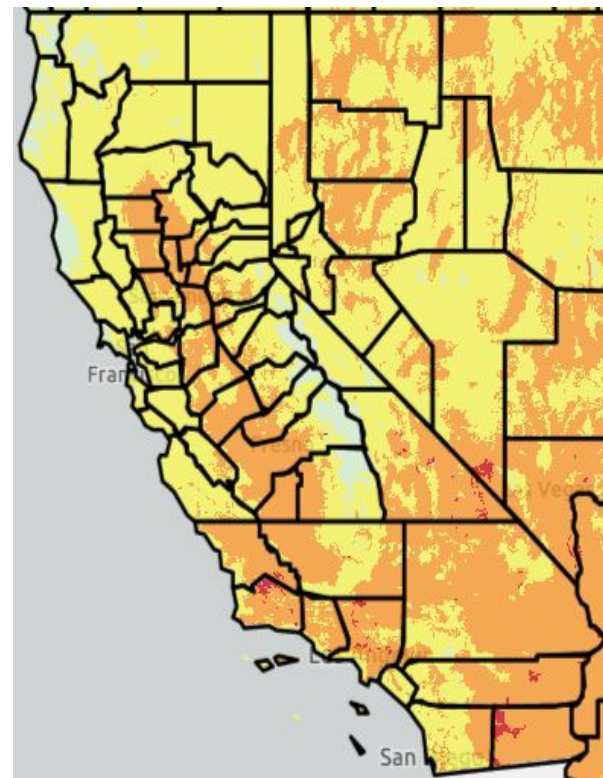

Sunday

Monday

Tuesday

Green	Level 0	No Elevated Risk
Yellow	Level 1	Low Risk for those extremely sensitive to heat, especially those without effective cooling and/or adequate hydration
Orange	Level 2	Moderate Risk for those who are sensitive to heat, especially those without effective cooling and/or adequate hydration

Red	Level 3	High Risk for much of the population, especially those who are heat sensitive and those without effective cooling and/or adequate hydration
Magenta	Level 4	Very High Risk for the entire population due to long duration heat, with little to no relief overnight

Weather Outlook (6-14 Days)

Regional Operations Center

Western Region

Sunday, June 26

6-10 Day Outlook (July 1 - July 5)

Temperatures

- Below normal temperatures are favored for most of the state, with the exception of far southern California where near normal temperatures are favored

Precipitation

- Near normal precipitation is favored for the majority of the state, with above normal precipitation favored along the Oregon border and below normal precipitation over the Sierras

8-14 Day Outlook (July 3 – July 9)

Temperatures

- Below normal temperatures are favored statewide

Precipitation

- Near normal precipitation is favored for most of the state, except below normal precipitation is favored across the Sierras

Risk Assessment Matrix

Regional Operations Center

Western Region

Sunday, June 26

Impact Level Definition

- 1. Impactful weather is not expected.**
- 2. Potential threat to lives and property if no/incorrect actions are taken.**
 - Localized impacts on commerce possible.
 - Includes events that occur frequently.
- 3. Potential threat to lives and property if no/incorrect actions are taken.**
 - Impacts on commerce possible.
 - Includes events that occur a few times per year.
- 4. Actions likely needed to save lives and/or property.**
 - Significant impacts to commerce possible.
 - Includes events that occur infrequently.
- 5. Actions required to save lives and/or property.**
 - Significant and extended impacts to commerce.
 - Includes exceptionally rare events.
